PROJECTS

1. TIC-TAC-TOE using Py Games

Here I have used Py Game, a framework of python along with an AI algorithm(MIN-MAX) to make a game of TIC-TAC-TOE.

2. CONNECT chat webapp

It was a hackathon(Diversion 2k23) project and I was handling the Backend part and did that using Djnago a python framework.

3. E_Tutor a webapp to find nearby tutor online

It was also a hackathon project (Hack4bengal 2k23) And I am maintaining the backend of the webapp using DJANGO
